

Delaware Department of Technology and Information
FY25 Joint Capital Improvement (Bond) Committee

CIO Greg Lane and COO Jerry Whisman
May 1, 2024

1

Core Network - \$8,267,000 Requested (Year 1)

This funding is needed for a multi-year project to address end-of-life infrastructure hardware that is vital to maintaining voice and data connectivity on the state network.

2

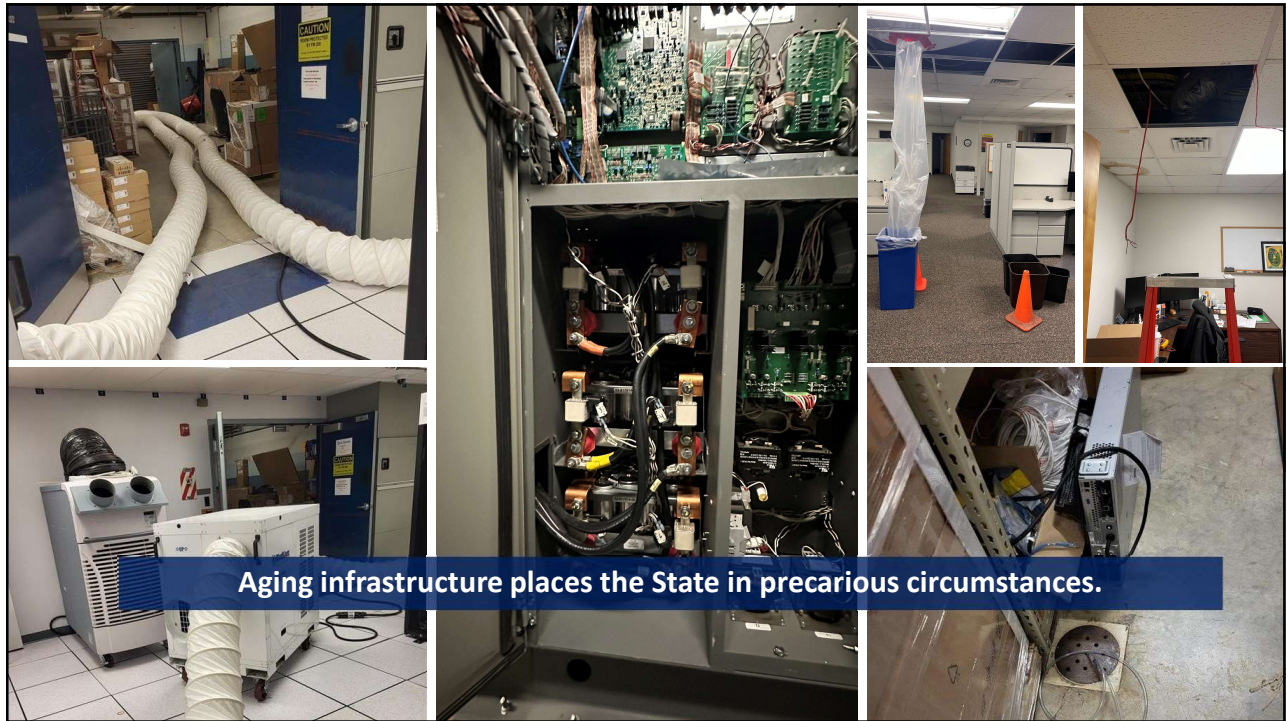

Data Center - \$11,000,000 Requested

The William Penn Data Center project will address aging critical facilities, including electrical, cooling, and fire suppression.

Modernizing these facilities will improve the availability and resiliency of the data center that houses some of the State's most important computing assets.

3

Aging infrastructure places the State in precarious circumstances.
