Fiscal Year 2026 Annual Report

Resource, Conservation, and Development Fund

Background

The Resource, Conservation and Development (RC&D) Fund was established by the Twenty-First Century Fund Investments Act of 1995 that resulted from a settlement with the State of New York. The RC&D portion of the Act was created to provide funding to enhance the health of communities by improving watershed and drainage infrastructure statewide. The fund is implemented by a partnership between the Department of Natural Resources and Environmental Control (DNREC) and Delaware’s three Conservation Districts. The New Castle Conservation District takes the lead on projects located in New Castle County. Kent and Sussex Conservation Districts are leads on a portion of the prioritized projects, as assigned by DNREC, to increase the number of projects constructed.

Fund Status

Over \$131 million has been allocated to the fund since 1996. Table 1 summarizes the breakdown of allocations by county.

Table 1: Summary of Allocations

	New Castle	Kent	Sussex	Total
FY 1996 – FY 2009	\$44,558,354	\$6,692,720	\$11,361,245	\$62,612,320

DNREC’s Drainage Program and the Conservation Districts completed 181 projects to date in FY 2026. **Table 2** is an excerpt from the RC&D Fund Expenditure Report (Appendix A). It shows the funds expended between FY 2015 and FY 2026; a total of 979 projects were completed in this period. A list of the projects that have been completed in FY 2026 is contained in Appendix B. The lists are reported by county and contain the total project cost and the legislative district where the project was located. Those projects that DNREC, or one of the Conservation Districts, are recommending be discontinued or removed from the approved list are included in **Appendix B**.

Table 2: Summary of Expenditures

Table 3 Summarizes the approximate remaining balance of RC&D program funds as of June 15, 2026. Epilogue language requires that funding which has been allocated to a particular county be spent within that county. It is important to consider the remaining balances within each county, rather than the remaining balances statewide. Unexpended funds are allocated dollars that have not been spent by DNREC. Encumbered funds are funds that are unspent, but committed to another entity, including the Conservation Districts, through a signed agreement or contract. Unencumbered funds are unspent funds that are available to be committed to a project through agreement or contract. Unencumbered funds can be viewed as dollars available for future work.

Table 3: Total County & State Fund Balances by County

	New Castle	Kent	Sussex	Statewide
Unexpended	\$12,512,598	\$3,579,961	\$6,683,420.57	\$22,775,979.57
Encumbered	\$12,512,598	\$2,580,706	\$3,701,620.57	\$18,794,924.57
Unencumbered	\$ -	\$999,255	\$2,981,800	\$3,981,055

Although there are balances remaining for each county, the work currently planned in all counties exceeds available funding. The next section of this report provides an explanation of FY 2026-FY2027 work that is planned in each county.

Active and Proposed Projects

Each year DNREC, in consultation with the Conservation Districts, prepares a list of projects in each county (Appendix C). Project prioritization is used as a tool to guide project development; however, it is an ongoing process that is flexible and allows funds to be directed to critical projects. The following factors are considered when prioritizing projects.

- Public Safety
- Frequency of Flooding
- Status of Project
- Property Damage
- Ability to Leverage Additional Funds
- Age of Projects

DNREC monitors the Statewide Drainage Concern Hotline, which provides a single point of contact to help constituents get assistance from the agency best suited to address their drainage issues. Constituent concerns not related to stormwater management and on private property are generally assigned to the DNREC Drainage Program in Kent and Sussex Counties, and the New Castle Conservation District in New Castle County, for investigation. Concerns that are investigated may be added to the list of proposed projects, if deemed appropriate. **Table 4** provides a summary of active and proposed projects.

Table 4: Project Summary Table

	New Castle	Kent	Sussex	Total
Active	895	210	365	1470
Proposed	72	6	13	91
Total	967	216	378	1561

There are now 1470 active projects that have been approved by the Joint Committee on Capital Improvement. Active projects are defined as projects that have been approved by the Joint Committee on Capital Improvement in previous fiscal years but are not fully constructed. Active projects can range from the initial project scoping phase to project construction. Ninety-one (91) projects are proposed for FY 2027 with a total cost of approximately \$7.5 million. The proposed additions to the list already exceed the proposed FY 2027 appropriation, further increasing the funding deficit for future projects.

It is estimated that the total cost to complete all 1470 active and proposed projects as described herein is approximately \$141 million. If all projects are matched at the minimum requirement, (10%), then approximately \$126.9 million of RC&D funds will be required to construct these projects. When including the approximately \$24 million of unexpended RC&D funds, an estimated total of \$102 million of additional RC&D funds would be needed to resolve all the watershed and drainage issues identified in this report. DNREC does not suggest an appropriation of \$102 million, there is not enough capacity to spend those dollars, but that number is a useful reference point to understand the statewide need for assistance with watershed and drainage issues. **Table 5** summarizes the estimated funding to complete the active and proposed projects.

Table 5: Projected Project Costs Summary Table

	New Castle	Kent	Sussex	Total
Active Projects Estimated Cost	\$73,013,978	\$20,149,222	\$46,636,161	\$139,799,361
FY27 New Project Estimated Cost	\$3,028,200	\$795,000	\$1,929,088	\$5,752,288
Estimated Cost All Projects	\$76,042,178	\$20,944,222	\$48,565,249	\$145,551,649
RC&D Funds Required	\$68,437,960	\$18,849,799	\$43,708,724	\$130,996,483
RC&D Unexpended	\$12,512,598	\$3,579,961	\$7,327,569	\$23,420,128
Fund Deficit	\$55,925,362	\$15,269,838	\$34,691,326	\$105,886,526

Fiscal Year 2027 Priorities

DNREC and the Conservation Districts do not have the capacity to complete all the approved projects in a single year. Therefore, as part of the project prioritization process, we look at the fiscal year ahead and develop priorities to estimate the funding needs in each county. As expected, the Prioritized Project List and Annual Priorities for each county can change over the course of any given year. Changes in priority may result due to severe weather events, threat/risk to public safety, disapproval of essential landowners within the project scope, and/or the opportunity to leverage supplemental funds to obtain additional dollars for implementation.

DNREC and the Conservation Districts look for opportunities to leverage supplemental funds through grants; some grant programs have lengthy application and approval requirements which can delay project implementation. If a particular project meets grant criteria, it may be prioritized to take advantage of the opportunity. RC&D funds have been used to leverage federal dollars through the Environmental Protection Agency grants. Projects have also taken advantage of surface water planning grants from the Water Infrastructure Advisory Council and funding through the National Fish and Wildlife Federation. The next three sections explain the priorities of each of the three counties as we move into FY 2027. These priorities are developed with consideration of available funding and the assumption that additional FY27 funds will be available.

New Castle County Priorities FY 2027

This section explains the projects that the New Castle Conservation District and DNREC anticipate working on for the remaining weeks of FY 2026 and FY 2027. This plan was developed with the assumption that funds are available. As always, it is worth noting that projects require 100% agreement from landowners. Therefore, the time required to obtain landowner agreement may affect the construction schedule.

Projects Currently Under Construction

- **Elsmere Gardens – Bungalow Avenue** – installation of trench drains and curbing to divert water away from the garages and rear yards of 225-237 Bungalow Avenue.
- **Upper Pike Creek Road Stream Restoration Projects** – the stream restoration project has been fully permitted and is under construction.
- **Red Lion Road - Lums Pond State Park Drainage** – Project is designed to reduce stormwater impacts to several residential properties on Red Lion Road. NCCD just received owner’s signature from DNREC and expects construction to begin shortly.
- **Shields Lane** – installation of new piping under Shields Lane to provide residents with relief of flooding and lack of access to their homes.
- **Dutch Neck Farms** – installation of an improved swale and removal of debris and silt buildup to provide relief of flooding for several residents along Netherlands Drive.

Projects Approaching Construction (i.e., fully funded)

- **Pencader Cemetery Drainage** – Project design plans are complete and awaiting nation-wide permit from the Army Corp of Engineers. The contractor has been selected through the bid process and will begin construction after permits are received.
- **White Clay Creek Dam Removal Projects** – Finalizing Memorandum of Understanding and completing studies and permits to prepare for removal of dams along the White Clay Creek.
- **Stanley – 1576 Pole Bridge Road** – replacement of an existing undersized stormwater management pipe and installation of outfall protection to improve drainage.
- **Oakwood – Hannum Drive** – installation of underdrain and swales in the rear yards of multiple residents along Hannum Drive will provide drainage improvements and reduce standing water.
- **Arbour Park – 309-315 Dove Drive** – installation of a combined closed and open drainage system as well as maintenance of several existing swales will provide drainage relief to multiple residents along Dove Drive in Arbour Park.

Key Projects in the Development Phase

- Rose Gate Drainage & Walkway Pilot Project
- Hickman Row Drainage
- Autumnwood – 35 Springbrook Lane
- Pine Valley Farms – Sugar Pine Drive
- Brookfield – 20 Spring Drive
- Town of Elsmere – Vilone Park and Dogwood Hollow at Dupont Road

Key projects needing funding

- **Roseville Park** – an engineering study and estimates have been completed and recommendations made to convert the drainage system at Roseville Park from an open to closed system. Phasing has also been provided.
- **Stoney Batter Condo Drainage** – The community does not have a closed drainage system to handle the storm water run-off. The surface drainage flows to the back of the community into a channel that is eroding and is potentially unsafe. Plans to address the erosion and repair the channel are being developed. Funding is needed for the construction of the project.
- **Dragon Run Stream Restoration - Kingsmill Mobile Home Park flood** – Pending DelDOT-DNREC Water quality improvement project and related flood reduction project has an estimated cost of +/- \$800,000 as of May 2024.
- **Limestone Hills - 155 New Granville Road** – Severe erosion in the drainage ditch is causing damage to the property at 155 New Granville Road. The estimated repair is in the \$300,000 range.
- **Westridge – 500-504 Thorndale Drive** – recommendations have been made to re-establish the diversion berm and channel at the top of hill of these residents and direct stormwater toward McGovern Road. The estimate for improvements is \$70,000.
- **Immaculate Heart of Mary Church** – recommendation have been made for drainage improvements along Weldin & Shipley Roads. The estimate for improvements is \$85,000.
- **Lamatan II – Flint Road Drainage Improvements** – a study and plans were completed by a consultant for drainage improvements with estimates for construction ranging from \$120,000 to \$130,000.
- **Cavagrado - 5 & 7 Mock Drive** – severe erosion is jeopardizing the safety of other infrastructure including the road and utilities. The estimate for improvements is \$150,000.

Kent County Priorities FY 2027

This section explains the projects that Kent Conservation District and DNREC anticipate working on for the remaining weeks of FY 2026 and FY 2027. As always, it is worth noting that projects require 100% agreement from landowners. Therefore, the time required to obtain landowner agreement may affect the construction schedule.

Projects Currently Under Construction

- S. Dupont Highway-Alam – Project includes Approximately 2,500 feet of ditch reconstruction. Several pipes will also be installed within the ditches.
- Smyrna Leipsic Rd. - Scuse Project includes dipout of a private ditch and replacement of pipes across several properties. The project has been surveyed and plans have been completed. Construction agreements have been secured, and the project is scheduled to be completed in the near future.
- Town of Farmington/Flat Iron Road

Projects Approaching Construction (i.e., fully funded)

- Tomahawk Tax Ditch Main - This project includes roadside swale grading throughout the neighborhood. Driveway pipes will also be replaced and set on proper grade.
- Pearsons Corner Road / Trice
- Arthurville Rd/Daniels
- Pharsalia – Vining Run
- S. State Street / Young
- Arthurville Rd/Daniels

Key Projects in Development

- Seven Hickories Rd. / Towery
- Polytech High School
- Hidden Acres
- West Denney's Rd / Blose
- Deep Grass Ln/Griffith
- Rt 13/DE Farm Bureau
- Town of Wyoming – Drainage Improvements
- Cattail Branch Tax Ditch Phase II
- Kitts Hummock
- Petunia Rd / Lowman

Key Projects Needing Funding

- **Kitts Hummock** – Drainage improvements to the Kitts Hummock community by improving and redirecting roadside drainage, improve the ditch systems within the community, and providing

maintenance to the community's bay outfall structure. Final plans have been designed, once environmental permits have been obtained, the project will be scheduled for construction.

- **Delaware Technical and Community College- Terry Campus-** Main channel that drains the campus and leads to Silver Lake has severe erosion issues. Project is in early stages and needs to be added to the approved list.

Sussex County Priorities FY 2027

This section explains the projects that the Sussex Conservation District and DNREC anticipate working on in Sussex County for the remainder of FY26 and FY27. As always, it is worth noting that projects require 100% agreement from landowners. As such, the time required to obtain landowner approval may affect the construction schedule.

Projects Under Construction

- **Neals School Road/Marvel** - Installation of drainpipes and swales between three properties to convey stormwater to existing roadside drainage system. Project will also include regrading an existing stormwater pond to allow for additional stormwater storage.
- **New Road Estates**
- **Bayard Rd/Allen**
- **Pear Tree Sherman**
- **Lester Ave/Anderson**

Projects Approaching Construction (i.e., fully funded)

- **Little Bay T.D. - Oceanside Pkwy Culvert Replacement** - This project has been scheduled for construction to begin after Labor Day.
- **Shawnee Acres -Mitchell** - Improvements to roadside drainage along Elks Lodge Road to stabilize eroding streambank and protect from future erosion.
- **Georgetown-Vaughn/Greenblatt**– Project consists of repair and stabilization of a large, eroded section of ditch bank on the Georgetown-Vaughn Tax Ditch.
- **Joe Dailey/New Road Lewes** – Project includes installation of drainage pipes within the New Road Estates neighborhood as well as along New Road to provide outlet into Tower Hill Stormwater Pond.
- **Rt 30 Whitesville Rd/Phillips** - This project includes replacing a failing catch basin and crossroad pipe on Whitesville Road.

Key Projects in Development

- Bay Colony – Cripple Creek
- Bridgeville Branch/Smith
- Cart Branch Stream Restoration
- Heritage Village Phase II
- Newport Village Dr/Klega
- Coral Court /Soyak
- Taylor Mill Road/ Middleton
- Ray Road/Braulio
- Long Neck Village
- Golf Village - Greenlee
- Washington Street / City of Seaford
- Route 9-McGowan
- Salt Pond/Sinamon
- Burton Road/Goodwin
- Hitch Pond Road - Evans
- Clearbrooke Estates – Damms

Key Projects Needing Funding

- **Longneck Village** – This project is currently in the design phase. Drainage improvements to the entire community are estimated at three hundred thousand dollars or more.
- **Oak Orchard Drainage Improvements** – Five high priority drainage projects were identified in the Oak Orchard Drainage Study. Two of the five projects have been constructed. DNREC has 100% designs for the Oak Meadows Community; however, substantial funding is needed to construct the Oak Meadows project and to design and construct the two remaining Oak Orchard Projects.

FY 2027 Funding Need

As of June 2026, there are \$3,981,055.00 unencumbered funds available for future RC&D Fund projects (refer to Table 3). This balance includes funds appropriated to DNREC and then allocated to each county based upon each county’s percentage of the estimated total cost of all projects (refer to **Table 6**). Epilogue language, in the Bond Bill, requires DNREC to track funds by county and mandates that funds allocated to a county be used within that county.

To determine the FY 2027 funding needs, DNREC has worked with the three Conservation Districts to identify priorities and estimate the funding needed to meet those priorities, as explained in the previous three sections of this report. **Table 6** below shows the projected expenditures for each county and then the entire state based upon these priorities.

Table 6: Summary of projected year end balances

	New Castle	Kent	Sussex	Statewide
FY 2026 Current Balance	\$12,512,598	\$3,579,961	\$6,683,420	\$22,775,979
FY 2027 Projected Expenditures	\$6,000,000	\$1,500,000	\$3,000,000	\$10,500,000
FY 2027 Recommended Funding*	\$3,000,000	500,000	\$1,500,000	\$5,000,000

***FY 2027 Governor’s Recommended Budget**

These projections are based upon the priorities developed by each county and explained in the previous three sections of this report. Many factors impact expenditures including weather, landowner permission, or permitting. The FY 2027 Governor’s Recommended Budget identified \$5 million to be allocated to RC&D projects, **Table 6** shows the recommended allocation of the \$5 million by each county.
