SYNOPSIS

Each year, the Department of Education (Department) publishes data regarding all Delaware public schools, currently known as School Performance Data Reports (reports). These reports are available on the Department's website as the Delaware Report Card.

This Act revises current law to correspond with and codify current Department practices regarding these reports as follows:

- Changes the term "Education Profile" to "education-related data" to reflect the broad range of data that the Department publishes, in addition to the annual reports required under existing State and federal law.
- Requires that there is a link to these reports on the school choice website.
- Requires that these reports continue to include proficiency rates.

In addition, this Act requires that the Department do all of the following:

- Provide a link to these reports on the home page of the Department's website.
- Include a list of a career pathways offered at a high school in these reports.

This Act also makes technical corrections to conform existing law to the standards of the Delaware Legislative Drafting Manual which includes revisions to clarify repetitive, confusing, or contradictory language.
